

ASSA CODED 1.2

Digital Cabinet Lock

ASSA CODED 1.2 Digital Cabinet Lock

Upgrade your existing coin locks

For a cost-effective and secure key-free environment, Codelocks are ideal multi-code, multi-function, programmable locks used in a variety of applications, from cabinets to lockers.

Why use a Codelock?

- Designed for lockers that are utilised by many users throughout the day
- Codelocker Lock provides keyless security for shared and nominated use lockers
- For use on high traffic, secure cabinets
- No lost keys to worry about

Features:

- Minimal programming time / 4 code levels
- Upgrade the existing ASSA Classic locking mechanism for high security
- Management by-pass key code available at all times
- Suitable for both wet and dry environments (IP54 rated)
- Easy to operate with audible buttons
- Simple retrofit solution for existing ASSA key locker locks
- Strong unit provides attractive and durable solution
- Auto-unlock feature prevents 'squatters'
- Stainless steel hard wearing push buttons
- Technician code facility
- Secure battery storage and replacement
- Low battery warning / battery failure override facility

Benefits:

- Flexibility in the use, and administration of, lockers in all environments
- No risk of 'master key loss'
- Users cannot claim rights or 'squat' in a public locker
- Long battery life: tested to 50,000 openings
- Hard wearing in any environment
- Technician code allows for immediate change over
- Locker function can be changed between single use code and repeat code as needed

Versions available

The ASSA CODED 1.2 digital cabinet lock is the ideal solution for those applications where the management and loss of keys is a frequent occurrence that not only compromises security but adds an additional on-cost to the maintenance and upkeep of a locker/cabinet installation.

For use not only on lockers, but also suited for such applications such as Drug Cabinets and Key Cabinets. Easily upgrade ASSA cam locks and coin operated locks whilst using existing hardware and fixing holes, keeping costs down by using existing hardware and saving time on installation.

By removing the existing coin lock cylinder barrel and utilising the coin lock casing on the rear of the door, you will then have a digital coded coin lock which can also be used with a coin collect box (should you so wish) giving a revenue stream by charging the user for use of a locker. A time out facility will also prevent the common problem of locker personalisation.

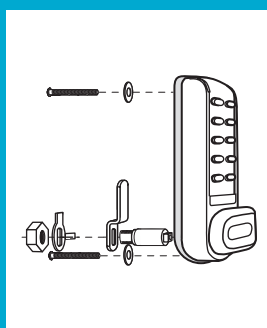

Solution

Before

After

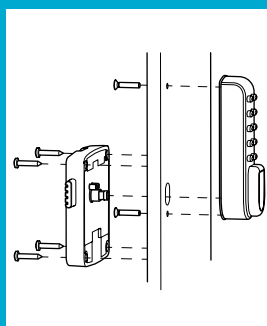

CODED 1.2 Cam Lock

Upgrade from existing cam lock, using existing fixing holes and strike plate or easily fit to new doors that do not have an existing locking device. Simply remove existing cam lock and fit CODED lock.

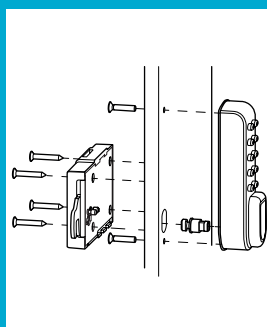

Coin Lock

CODED 1.2 Unit fitted in conjunction with E-Lite coin lock. Can be purchased complete with E-lite coin lock case or supplied without case for retrofit upgrade of existing ASSA E-lite coin lock. Simply remove existing coin lock cylinder with management key and utilise component items supplied with the CODED 1.2 unit.

Classic coin lock upgrade

CODED 1.2 Unit fitted in conjunction with Classic coin lock. Can be purchased complete with Classic coin lock case or supplied without case for retrofit upgrade of existing ASSA Classic coin lock. Simply remove existing coin lock cylinder with management key and utilise component items supplied with the CODED 1.2 unit.
